The weather during the past week has been unfavorable to cotton growers. We have had several very heavy rains, which must have greatly retarded the picking, which had commenced quite briskly.

Sicksess .- The unusual amount of sickness that has prevailed here for the last lew weeks, has been general throughout the State. Our exchanges from every quarter complain of the sickness.

AGRERABLE DISCOVERY .--- Within the past two weeks several bales of cotton have been brought in. It had to be weighed, and the pleasing discovery was made that the newlyelected weigher, our friend, W. J. Kendall, could weigh a bale of cotton with great expedition and accuracy, notwithstanding be may not have been the choice of the merchants. The fact is, Kendall carried much weight into the office, and we predict that even the merchants will find that he will "do to cotton to."

New Corros - Several bales of the long staple have found their way to our market, and the planters have realized the very remunerative prices of 301 to 20 cents 70 th.

Steam Corn and Flour Mill. By advertisement in to-day's lasue, it will be seen that those enterprising gentlemen, Messrs. Jones & Stewart, projectors and proprictors of the "Canton Steam Mill," are now prepared to respond to wil calls from the public for the grinding of Flour and Corn Meal, "the best in the world," if the grain will justify that result. They also plane lumber as smooth as Parian marble, and on the 15th inst, will begin to gin cotton at the rate of a 12th, 14th and 16th, according to the number of bales sent in. They also pay the highest market price for wheat. The establishment of Mesurs. J. & S. is a great pub lic convenience, and is appreciated accordingly. Grird on.

Alsworth's Sulky Cultivator.

An advertisement of this agricultural implement appeared in the last issue of our paper. It has been thoroughly tested by these experienced farmers, Messrs. Jackson Warren and E. D. Cox, among others, and is planters need. In due time a number of cer. Store East Side of Public Square. tificates of its adaptability to the requirements of agriculturists in this section, will be published. It is a Southern invention, being the product of the genius and labor of our young friend, Mr. A. C. Alsworth, a native of Madison county, residing six miles West of Canton, where one of his inventions CANTON MANUFACTURING COMPANY may be secu.... This cultivator will also possess the merit of being Southern-made, us they will be manufactured by the "Canton Manufacturing Company," an establishment that has already become one of the institutions of the country, where they "turn out" almost every thing, from a barlow-knife to a hogshead, or from a cork-screw to a

steam-engine. If a man who " makes two blades of grass to grow where but one grew before " be "a benefictor of his race," then he who invents a machine by which one man and two mules can perform the work usually performed by four men and eight mules, is certainly equal to half a dozen grace-growing benefactors. THE GREATEST DISCOVERY KNOWN TO THE

EUREKA LIFE-BLOOD ELIXIR!

HAS ht last made its way into this country, after having been in use in the Old World for so many years, and especially in China. The celebrated Archemets and Chemist, Dr. Hepserdam, of Pekin, China has at last consented to his great Christisi Reservy being introduced on this continent, and has established wholesale agencies for the purpose of supplying all draggists throughout the towns ond cities of our country. This great Blood Medleine has performed cares (the most astonishing), where every other remedy known in Maleria Medica has most signally failed.

IT IS NO HUMBUG

OR QUACK NOSTRUM,

but is a preparation which has been brought out after many long years of the deepest research, aid-ed by the greatest chemical science and skill that could be brought to bear in its production, we therefore place it wholly
